Organizes hardware
Improves accessibility
Completely modular
No Compromises
Datum takes away the compromise between the beauty and the beast — lightweight tech furniture that looked good but didn’t perform or heavyweight assembly systems that had to stay hidden. Datum’s Technical Furniture System (TFS) gives you a front office furniture look along with rock solid performance for use even in assembly areas.

Datum, well-known for efficient, quality furniture and filing systems, applied their expertise in designing modular technical furniture for computer applications that works as good as it looks. Input from customers was an important factor in the developmental process. The design includes highly desired features for LAN systems such as configuration flexibility, excellent cable management, easy equipment access and user efficiency. The system design is the newest available and eliminates many annoying faults found in other older designs. An extensive accessory line allows you to equip your system to precisely meet your needs.
Sizes to Meet Your Needs

TFS is available in five heights (36", 48", 60", 72", and 84") which enable you to make efficient use of vertical storage space. TFS incorporates a 1 1/8" thick laminated work surface with durable PVC edging, work surfaces are offered in 24", 30" and 36" depths. In order to provide horizontal flexibility, TFS is available in widths from 24" to 72". Join several units together to create your own system layout. Corner work stations and programmer tables further enhance your design capabilities.

All TFS accessories are adjustable on 1" centers. Shelves are constructed of heavy duty cold rolled steel for added strength. Many TFS accessories are interchangeable with Datum's line of Cluster Furniture.

TFS provides optional rack mount brackets for any 24" or 30" wide frame; brackets fit standard EIA accessories.

Datum also provides a series of “TEC” Enclosure Cabinets with a full array of accessories to store additional hubs, rack mount modules, towers, keyboards and other computer components.
**Modular Design**

Frames are heavy duty steel with tough, environmentally friendly powder coatings in light gray and bone white, custom colors also available. Laminate work surfaces stay looking good even with hard use. Heavy duty shelving is fully adjustable and can be used flat or tilted. Corner work surfaces and shelving provide layout flexibility for all types of configurations. Exclusive anti-knockout tab prevents accidental dislodging of work surfaces and accessories. Frame ends are available with a solid end cap, grommeted end cap or no end cap to join direct with another frame.

**Simple Cable Management**

Wire management is a major consideration and the TFS is designed for efficient cable management in all configurations — technical workstation, LAN rack systems, assembly station or other uses.

Vertical wire guides allow fast access to wires yet cover unsightly wire clutter.

The 3 “U” channel horizontal cross members provide support and simplify cable management.

“T” frame units for back-to-back configurations are also available. Cable access is simple regardless of the configuration.

Backs may be left open or covered with a unique louver panel which allows ventilation without the use of supplemental fans.
Accessories
Datum offers an impressive selection of accessories to tailor systems to your precise needs.

- Slide-out Keyboard
- Pull-out Server Shelf with optional Cable Bridge
- PowerLink
- Keyboard Tray
- Fixed Server Shelf
- Task Lights
- Articulating Keyboard w/Mouse Pad
- Slide-out Keyboard under shelf
- Storage Cabinets w/solid back
- Pull-out Printer Shelf
- Corner Shelf
- Casters
- PowerBar
- Shelves available flat and adjustable, slotted or unslotted
- 45° Corner Shelf
- Flat Server Monitor Arm
- Tack Board
- Corner Tack Board
Versatility Meets Protection
In the ever-changing world of technology, companies require proper storage solutions to meet their needs, as well as protect their valuable equipment. Datum’s Technical Enclosure Cabinets (TEC) can do both, in addition to offering security.

Datum’s enclosure cabinets are perfect for protecting your valuable servers from damage or unwanted access. Vented back panels, shelves and top panels ensure your servers receive the proper front-to-back airflow required to keep it cool and dry. Optional top-mounted exhaust fan provides the greatest protection available from air-borne dust and contaminants. TEC cabinets also provide the versatility to tailor our product to meet your needs. Datum’s optional accessories include keyboard shelves, slide-out drawers and rack-mounted outlet strips. Cabinets are constructed of heavy-duty steel and feature an attractive smoked Plexi-Glass front door. Cabinets feature an open bottom for cables while boasting locking front and back panels for security. Like all Datum products, the TEC cabinet is backed by a lifetime warranty.
Datum “TEC” Enclosure Cabinet Features:

- Unit is excellent enclosure for file server and tower installations
- Hardware is fully protected and fully accessible at the same time
- Unit is accessible from all sides
- Conforms to EIA-310 standards for enclosed racks
- Ideal for rack mount components
- Furnished with two pair of 12-gauge steel EIA mounting rails
- Mounting rails are fully adjustable front to back
- Mounting rails are tapped for #10-32 on 1/8", 3/8", 1/2" universal spacing
- Cabinet members are constructed of 16-gauge steel
- Fully welded cabinet construction
- Standard paint finishes are light gray & black
- Cabinet base has 18" x 12½" cutout for cables
- Smoked Plexi-Glass front door
- Optional exhaust fan can be added to top panel
- Doors are hinged right unless otherwise specified
- Perfect compliment to Datum’s Technical Furniture System™
- Unit doors are lockable on all sides
